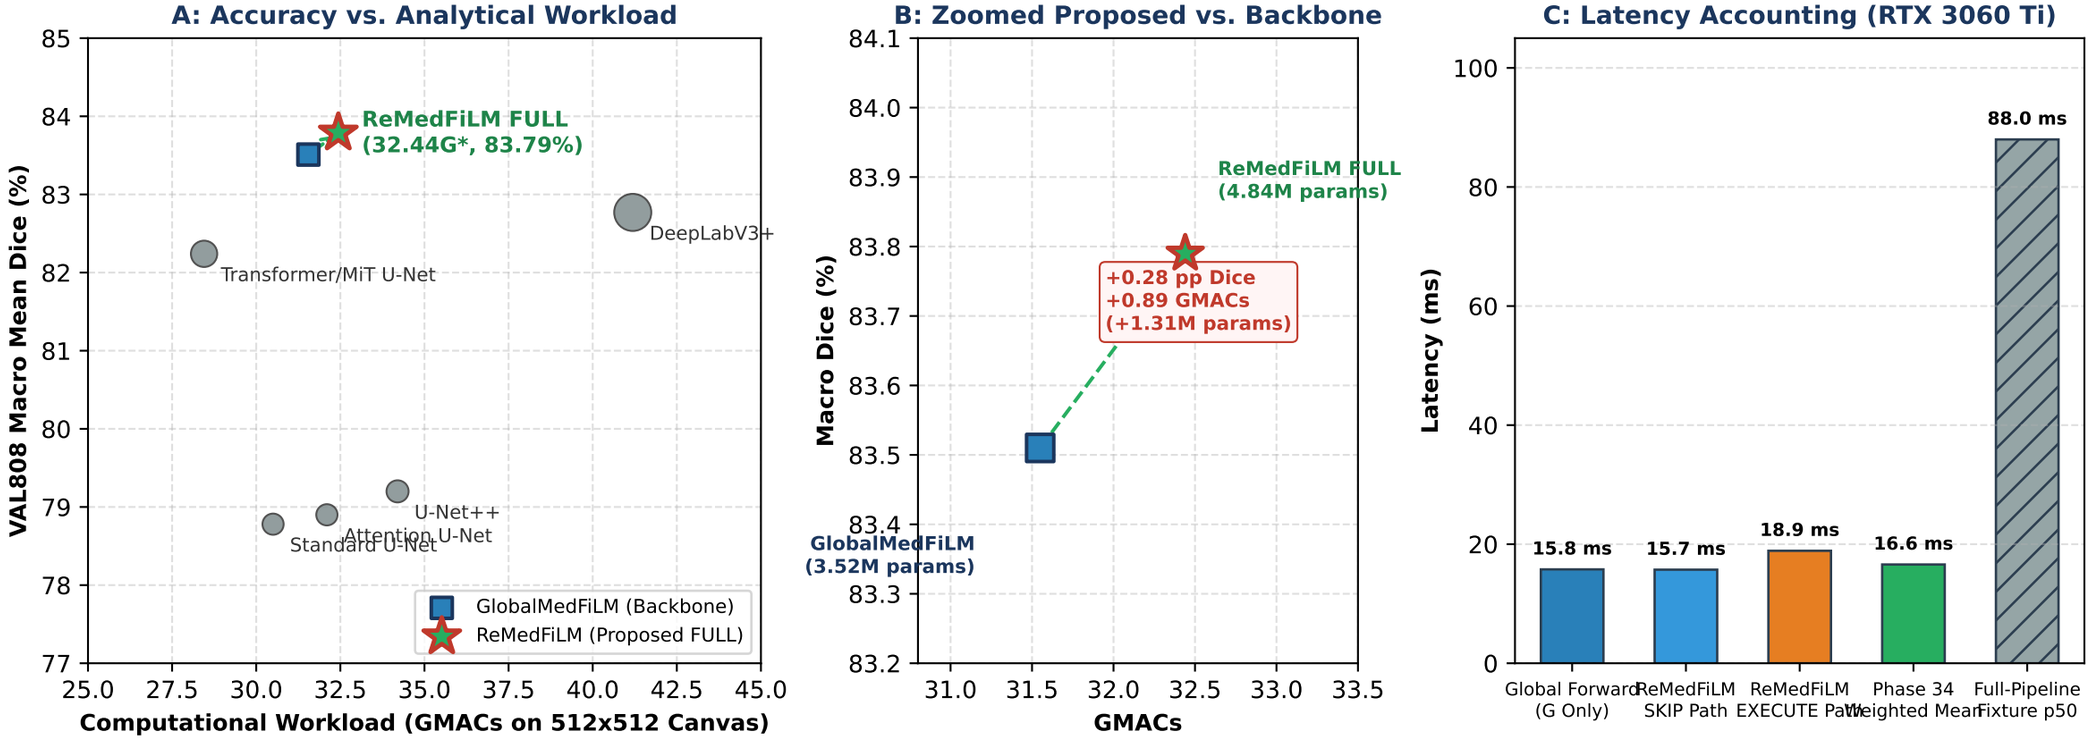
FIG 16. ReMedFiLM Computational Efficiency, Accuracy Trade-Off & Latency Accounting



ow analytical GMACs vs VAL808 Dice (*ReMedFiLM GMACs is expected conditional compute: 31.55 + 0.274 * 3.23 = 32.44 GMACs). Panel C separates model forward pass timings (Phase 34 v1.4, RTX 3060 Ti, batch=1, 1000 iter) from the separate full-pipeline fixture latency (Phase D, 87
